Environmental Policy v1.5

Our aim is to continue to develop

- Comply with all relevant environmental legislation, regulations and codes of practice.
- Ensure that these policy commitments including the minimisation of waste and use of plastic extends to outsourced suppliers and the supply chain.
- Work with our educational partners to encourage good environmental management practices in partnership campuses.
- Publicly report our progress against these policy commitments on a regular basis.

To ensure the effective implementation of this policy we will set appropriate objectives and targets which will be reviewed on a regular basis.

We will also review this policy on a regular basis to ensure it remains appropriate to the nature, scale and environmental impacts of our activities, products and services.
